

NGUYEN NGOC TIN

+84 397 662 903 | Go Vap, HCM | ngoctin.work@gmail.com | <https://github.com/ngoctinn> | [Linkedin](#)

EDUCATION

Saigon University (SGU) | Ho Chi Minh City, Vietnam | Mar 2021 – Jun 2026

Engineer in Information Technology

Major: Information Systems

- **Cumulative GPA:** 7.58 / 10.0
- **Language Proficiency:** TOEIC 625/990 | Jun 2026.

SKILLS

Programming Languages: Python, Java (Core), JavaScript, TypeScript

Frameworks and Libraries: Next.js (App Router), React, FastAPI, TailwindCSS, shadcn/ui

Cloud Infrastructure (AWS): Lambda, SAM, API Gateway, Cognito, DynamoDB, Bedrock, Transcribe, Polly, Amplify

Protocols and APIs: RESTful APIs, WebSockets

Databases and Tools: PostgreSQL, MSSQL, Git, Docker, GitHub Actions, Excel, Linux

Core Coursework: Object-Oriented Programming (OOP), Data Structures and Algorithms,

Database Management Systems, Computer Networks, Operating Systems, Software Engineering

EXPERIENCE

FCAJ | Cloud Application Development Intern | Ho Chi Minh City, Vietnam Mar 2026 – May 2026

- Developed and deployed an event-driven serverless prototype application using Python and AWS Lambda to optimize core backend logic processing.
- Authored comprehensive technical documentation, architectural blueprints, and setup guides for serverless services to streamline team development workflows.
- Researched and integrated core AWS services into the project lifecycle, managing version control and environment consistency utilizing Git.

PROJECTS

Lexi – AI-Powered English Speaking Tutor | Next.js, TypeScript, Python, AWS | [Link GitHub](#) Mar 2026 – May 2026

Demo: [Link Youtube](#)

- Designed and implemented a cloud-native serverless backend using AWS SAM, API Gateway, Lambda, Cognito, DynamoDB, and S3, following Clean Architecture with clearly separated Domain, Application, Interface, and Infrastructure layers.
- Developed a responsive frontend using Next.js App Router, TypeScript, and Tailwind CSS, integrating authentication, AI speaking sessions, and vocabulary management with automated deployment via AWS Amplify.
- Built a real-time AI speaking pipeline using API Gateway WebSocket, Amazon Transcribe, Bedrock, Polly, and S3 to support low-latency conversational English practice.
- Modeled a DynamoDB Single-Table schema with composite keys and GSIs to efficiently manage user profiles, flashcards, speaking sessions, and learning scenarios.

Bilingual Movie-Based English Learning Platform | Next.js, TypeScript, FastAPI, Python, SQLite | [Link GitHub](#) Mar 2026 – Present

Demo: [Link Google Drive](#)

- Developing a full-stack language learning platform using Next.js, FastAPI, Python, and SQLite, featuring bilingual subtitle synchronization, contextual dictionary lookup, and personalized vocabulary management.
- Implementing RESTful APIs with FastAPI to support subtitle synchronization, vocabulary management, and user learning workflows.
- Integrated the Google Gemini API to generate contextual grammar explanations, vocabulary definitions, and sentence-level learning assistance from movie dialogues.
